Principles of Eco Agriculture

The principles of ecological agriculture-

1. Diversity
2. Living soil
3. Recycling
4. Multi-storey structure

Briefing by Mr Kenny

Fruit Trees

Vegetable Plot

Compost

Soil enriched with microbes

Cooked organic vegetables for lunch

Green Wish Vegi Garden

Green Wish Vegi Garden

Mengamalkan pertanian **Organik**, yang

- 1) bebas daripada bahan sintetik baja, racun kimia, hormon & GMO;
- 2) mengurangkan pencemaran alam sekitar.

Dan menitik-beratkan

- 1) keselamatan, kebajikan & kebolehan pekerja;
- 2) productivity (yang banyak hasilnya);
- 3) hasil yang berkualiti tinggi;
- 4) keuntungan

“Kita beri makanan kepada tanah, tanah akan beri makanan kepada kita !”

“We feed the soil, the soil will feed us !”

Kita buat secara organik.
We do it organically.
